PROFILE

Over a decade of experience leading high-impact projects and building robust, accessible web applications at scale.

EXPERIENCE

Senior Software Engineer, Airbnb; San Francisco, CA — 2017–2023

- Architected the guest reservation details page as a server-driven component usable in multiple contexts, improving access for both guests and hosts.
- Designed and spearheaded internal application creating new GraphQL development workflow, eliminating ramp-up time for developers to contribute code to the new schema
- Organized and facilitated creative retrospectives, department-wide hackathons, and "mandatory fun" events, fostering team collaboration and boosting morale

Lead Developer, Traction; San Francisco, CA — 2013–2017

- Led team projects: delegating tasks, providing mentorship and ensuring high technical quality via weekly shares and team code reviews
- Consulted with client on technical feasibility throughout design stage of projects
- Fostered strong technical relationship with the client
- Tested complex ally, content localization situations
- Delivered projects for firm deadlines tied to concurrent retail campaigns

Java Developer Intern, Travelocity; Dallas, TX — 2013

- Enhanced Travelocity's internal travel agent web app
- Designed and implemented UX for intern-led project

Developer Intern, Vertical Nerve; Dallas, TX — 2013

- Maintained over 30 client websites using in-house CMS
- Implemented new CMS features and instructed peers on CMS and UNIX usage
- Surpassed expectations by stepping into the role of solo developer after the lead developer's departure

EDUCATION

B.S. in Computer Science, University of Texas at Dallas, 2013
